Hazardous Products and Substances Register

Please see below, that we have a list of chemicals that we use on site. The chemicals highlighted will be the ones used for COVID-19 cleaning through most of our projects. The information about these chemicals have been provided in our SSSP to the contractor. However I am attaching the information separately for all employees to refer to and follow if they need.

Product	Safety Data Sheets Held	Related Harm	Initial Risk	PPE Required	Other Measures	Residual Risk
ALLKLEEN	Y	Burns / Eye damage	HIGH	Gloves, Mask, Glasses	Keep only in original container Wash after use	MODERATE
Cascade Window/ Glass cleaner	Y	Skin Irritation	MODERATE	Gloves, Mask, Glasses	Well ventilated areas	LOW
Fincol (Disinfectant)	Y	Skin irritation / serious eye damage	HIGH	Gloves, Mask, Glasses	Contaminated equipment not allowed off site	MODERATE
HYPOSTAT Sodium Hypochlorite	Y	Severe skin burns / eye damage	HIGH	Gloves, Mask, Glasses	Store locked up, well ventilated areas	MODERATE
Methylated Spirits	Y	Highly flammable liquid and vapour, causes eye irritation, harmful to aquatic life	HIGH	Gloves, Mask, Glasses	Read label before use, keep away from heat, sparks and open flames. Keep container tightly closed, wash hands after use	MODERATE
Fire Dog	Y	Harmful if swallowed, causes severe skin burns and eye damage.	HIGH	Gloves, Mask, Glasses	Keep only in original container, do not breathe in the fumes, wash skin after use.	MODERATE
Freeway	Y	Causes skin irritation, eye damage	HIGH	Gloves, Mask, Glasses	Use only in ventilated areas, wash hands after use	MODERATE
Concrete Dissolver	Y	Harmful if swallowed, severe skin burns and eye damage	HIGH	Gloves, Mask, Glasses	Read labels before use, do not breathe vapours, wash hands after use, store lock up	MODERATE
Hydrochloric Acid 33%	Y	Burns / Eye damage / fatal if inhaled, fumes, corrosive material	HIGH	Gloves, Mask, Glasses as stated in the safety data sheets	Keep only in original container Wash after use, vent periodically, avoid all personal contact.	MODERATE / HIGH

Product	Safety Data Sheets Held	Related Harm	Initial Risk	PPE Required	Other Measures	Residual Risk
Instant Hand Sanitiser	Y	Causes, skin irritation, eye damage. Highly flammable	MODERATE	Gloves, Mask, Glasses	Keep away from open flames, keep container tightly closed, wear PPE	LOW
Coolsan	Y	Flammable liquid, substance that is irritating to the eyes, Burns/ eye damage	MODERATE	Gloves, Mask, Glasses	Keep container tightly closed, wear PPE, keep away from heat,	LOW
Redline	Y	Highly flammable liquid and vapour, causes serious eye irritation	MODERATE	Gloves, Mask, Glasses	Keep container tightly closed, wear PPE, keep away from heat,	LOW
PowerQuat Blue	Y	Harmful if swallowed, severe skin burn, serious eye damage, toxic/ poisonous	HIGH	Gloves, Mask, Glasses	Don't not eat, drink or amoke when using the product, wear PPE, Store, locked up	MODERATE / HIGH
PeroxySan 30	Y	Toxic, corrosive to metals and inner organs, oxidiser,	HIGH	Gloves, Mask, Glasses	Keep only in original containers, use in well ventilated areas, store locked up,	MODERATE / HIGH
C-Tec K-San Disinfectant	N/A			Gloves, Mask, Glasses		
Wax and grease remover	N/A			Gloves, Mask, Glasses		

The highlighted chemicals above will be the main ones used on site for cleaning procedures and protocols involved in dealing with COVID-19.

To carry out the disinfection and sterilisation of surfaces across the multiple sites. Eagle Eye Limited will be using a Fog sanitation procedure which consists of **PeroxySan 30 / Powerquat Blue Fog Sanitation**. The concentration is as follows:

Chemical Step	Product	Concentration	Volume, (3.5L)	Time	Temperature
No rinse equipment fogging	PeroxySan 30 Powerquat Blue	0.20 % 0.13 %	7 mls per fill 5 mls per fill	10 minutes	Ambient

SDS information for C-Tec K San disinfection can be found on "The Service company" website.

SDS information for Wax and grease remover can be found on "TMK Packers" website.

If you wish to access the full safety data sheets for any of the chemicals mentioned, they can be found on JASOL website.

Peroxysan 30 / Powerquat Blue Fog Sanitation

Safety Precautions

- **Chemical Emergency Call: 0800 764 766**
- When using Chemicals always wear goggles/face shield, boots, gloves, and chemical apron.
- Use lockout/tagout as required by plant procedures.
- Use confined space entry as required by plant procedures when entering these areas.
- Use caution when walking on wet floors.
- Read and understand all product labels and Safety Data Sheets (SDS).

Chemical Step	Product	Concentration	Volume, (3.5L)	Time	Temperature
No rinse equipment fogging	Peroxysan 30 Powerquat Blue	0.20 % 0.13 %	7 mls per fill 5 mls per fill	10 minutes	Ambient

Fog Sanitation Procedures

Preparation & use

1. Confirm the area to be fogged has been isolated and all personnel can not enter the area until at least 30 minutes after the completion of the fogging.
2. Fill the fogging unit with 3.5 litres of clean cold water.
3. Add 7mils of Peroxysan 30 to the 3.5 litre fogging unit drum, (use a syringe or measuring vessel)
4. Add 5 mils of Powerquat Blue to the 3.5 litre fogging unit drum, (use a syringe or measuring vessel)
5. Close the vented cap and mix carefully by swirling
6. Ensure the metering valve is set on MAX to provide the largest droplet particle size
7. Position the fogging unit in the area to be fogged
8. Connect the fogging unit to the compressed air supply, (ensure this is done accordance with site specifications)
9. Turn the unit and confirm the unit is operating
10. Fog the area for up to 10 minutes
11. When fogging the area is complete move the fogging unit to another area and repeat steps 2 – 10, (ensure a respirator is worn).
12. When the fogging is complete turn off the unit, manually empty the reservoir of residual solution and pack the fogging unit away correctly until it is required again.
13. Ensure the fogged area is isolated for a minimum of 30 minutes unless a respirator is worn.

Note: The combination of Peroxysan 30 and Powerquat Blue will provide both immediate & residual sanitation & mould control.

At the recommended use rate both Peroxysan 30 and Powerquat Blue are "no rinse" sanitisers.

FOGGING IS NOT A SUBSTITUTE FOR NORMAL ENVIRONMENTAL CLEANING & SANITISING

Condensed key safety information

INSTANT HAND SANITISER

3.1B Flammable liquid: high hazard
6.4A (Mild irritant) - Substance that is irritating to the eyes

Recommended use: Hand Sanitiser, Surface Sanitiser.

Hazard Statement (s)

Highly flammable liquid and vapour.
Causes serious eye irritation.

Precautionary Statement (s)

Read label before use.

Precautionary statement – Prevention

Keep away from heat/sparks/open flames/hot surfaces. – No smoking.
Keep container tightly closed.
Ground/bond container and receiving equipment.
Use explosion-proof electrical/ventilating/lighting/equipment.
Use only non-sparking tools.
Take precautionary measures against static discharge.
Wash contaminated skin thoroughly after handling.
Wear protective gloves/protective clothing/eye protection/face protection.

Precautionary statement – Response

IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
If eye irritation persists: Get medical advice/attention.
In case of fire: Use for extinction.

Precautionary statement – Storage

Store in a well-ventilated place. Keep cool.

Precautionary statement – Disposal

In the case of a substance that is in compliance with a HSN0 approval other than a Part 6A (Group Standards) approval, a label must provide a description of one or more appropriate and achievable methods for the disposal of a substance in accordance with the Hazardous Substances (Disposal) Regulations 2001.

Personal Protective Equipment

Eye / Face: Not required under normal conditions of use

Hands: Not required under normal conditions of use
Body: Not required under normal conditions of use
Respiratory: Not required under normal conditions of use

Precautions for Safe Handling

Before use carefully read the product label. Use of safe work practices are recommended to avoid eye or skin contact and inhalation.
Observe good personal hygiene, including washing hands before eating. Prohibit eating, drinking and smoking in contaminated areas.

Conditions for safe storage, including any incompatibilities

Store in a cool, dry, well ventilated area, removed from incompatible substances and foodstuffs. Ensure containers are adequately labelled, protected from physical damage and sealed when not in use.

Accidental Release Measures

Emergency Procedures

Wear Personal Protective Equipment (PPE)

Methods and Materials For Containment And Cleaning Up

If spilt (bulk), mop up area. CAUTION: Spill site may be slippery.

Environmental Precautions

Prevent product from entering drains and waterways.

First-aid Measures – call 111

Inhalation

Due to product form / nature of use, an inhalation hazard is not anticipated.

Ingestion

For advice, contact the National Poisons Centre at 0800 764 766 (0800 POISON) or +643 479 7248 or a doctor (at once).

Skin

If an irritation or rash develops, gently flush affected areas with water and discontinue use.

Eye contact

If in eyes, hold eyelids apart and flush continuously with running water. Continue flushing until advised to stop by a Poisons Information Centre, a doctor, or for at least 15 minutes.

First Aid Facilities

Normal washroom facilities.

Advice to Doctor

Most Important Symptoms and Effects, Both Acute and Delayed:

Adverse effects not expected from this product under

normal conditions of use.
Immediate Medical Attention and Special Treatment
Needed:
Treat symptomatically.

Fire-fighting measures- call 111

Suitable Extinguishing Media

Water fog or foam. Prevent contamination of drains and waterways.

Specific Hazards Arising from The Chemical

Highly flammable. May evolve carbon oxides and hydrocarbons when heated to decomposition. Eliminate all ignition sources including cigarettes, open flames, spark producing switches/tools, heaters, naked lights, pilot lights, etc when handling.

Hazchem Code

2YE

Decomposition Temperature

Not available

Other Information

Advice for Firefighters:

Evacuate area and contact emergency services.
Toxic gases may be evolved in a fire situation.
Remain upwind and notify those downwind of hazard.
Wear full protective equipment including Self Contained Breathing Apparatus (SCBA) when combating fire. Use water fog to cool intact containers and nearby storage areas.

Condensed key safety information

Other Information

Advice for Firefighters:

Evacuate area and contact emergency services.

Toxic gases may be evolved in a fire situation.

Remain upwind and notify those downwind of hazard.

Wear full protective equipment including Self

Contained Breathing Apparatus (SCBA) when

combating fire. Use water fog to cool intact

containers and nearby storage areas.

Condensed key safety information POWERQUAT BLUE

HSNO Approval number: HSR002595

Recommended use: Sanitiser for food areas, moss and mould removal.

Hazard Statement (s)

Harmful if swallowed.
Causes severe skin burns and eye damage.
May cause an allergic skin reaction.
Causes serious eye damage.
May cause allergy or asthma symptoms or breathing difficulties if inhaled.
May cause damage to organs.
Toxic to aquatic life with long lasting effects.
Harmful to terrestrial vertebrates.

Precautionary Statement (s)

If medical advice is needed, have product container or label at hand.
Keep out of reach of children.
Read label before use.

Precautionary statement – Prevention

Do not breathe dust/fume/gas/mist/vapours/spray.
Wash contaminated skin thoroughly after handling.
Do not eat, drink or smoke when using this product.
Contaminated work clothing should not be allowed out of the workplace.
Avoid release to the environment.
Wear protective gloves/protective clothing/eye protection/face protection.
In case of inadequate ventilation wear respiratory protection.

Precautionary statement – Response

IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
IF SWALLOWED: rinse mouth. Do NOT induce vomiting.
IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
IF exposed or if you feel unwell: Call a POISON CENTER or doctor/physician.
Immediately call a POISON CENTER or doctor/physician.
Specific treatment (see on this label).
If skin irritation or rash occurs: Get medical advice/attention.

If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician.
Wash contaminated clothing before reuse.
Collect spillage.

Precautionary statement – Storage

Store locked up.

Precautionary statement – Disposal

In the case of a substance that is in compliance with a HSNO approval other than a Part 6A (Group Standards) approval, a label must provide a description of one or more appropriate and achievable methods for the disposal of a substance in accordance with the Hazardous Substances (Disposal) Regulations 2001. This may also include any method of disposal that must be avoided.

Personal Protective Equipment

Eye / Face: Safety glasses with unperforated side shields. Chemical goggles.
Hands: Elbow length chemical resistant gloves.
Body: Overalls/trousers are to be worn outside of boots.
Respiratory: If determined by a risk assessment an inhalation risk exists, wear a suitable mist respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716.

Accidental release measures

Emergency Procedures

Clean up all spills immediately. Avoid breathing vapours and contact with skin and eyes. Control personal contact by using protective equipment

Methods and Materials for Containment And Cleaning Up

Contain spillage then cover / absorb spill with non-combustible absorbent material (soil, sand, vermiculite or other inert material). Collect and place into clearly labelled, suitable containers for disposal.

Environmental Precautions

Prevent from contaminating drains and waterways.

Handling and storage

Precautions for Safe Handling

Avoid all personal contact, including inhalation. Wear protective clothing when risk of exposure occurs. Use in a well-ventilated area. Do not allow clothing wet with material to stay in contact with skin.

WARNING: To avoid violent reaction, ALWAYS add material to water and NEVER water to material.

Conditions for safe storage, including any incompatibilities

Container: Do not use aluminium or galvanised containers. Check regularly for spills and leaks.

Packing as recommended by manufacturer.

Storage: Store in original containers. Keep containers securely sealed. Store in a cool, dry, well-ventilated area. Store away from incompatible materials and foodstuff containers.

First Aid Measures – call 111

Inhalation

If inhaled, remove from contaminated area. Lay patient down and keep warm and rested. Apply artificial respiration if not breathing.

Ingestion

For advice, contact the National Poisons Centre at 0800 764 766 (0800 POISON) or +64 3 479 7248 or a doctor (at once). If swallowed, do NOT induce vomiting. Give patient a large glass of milk, egg whites/gelatine solution or a slurry of activated charcoal may be useful. Seek urgent medical attention.

Skin

If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with large amounts of running water. Continue flushing with water until advised to stop by a Poisons Information Centre or a doctor. Seek medical attention.

Eye contact

If in eyes, hold eyelids apart and flush continuously with running water. Ensure complete irrigation by keeping eyelids apart and away from eye and moving eyelids. Continue flushing until advised to stop by a Poisons Information Centre, a doctor, or for at least 15 minutes. Seek medical attention urgently.

First Aid Facilities

Eye wash facilities and safety shower should be available.

Advice to Doctor

Most Important Symptoms and Effects, Both Acute and Delayed: Inhalation of vapours or aerosols (mist, fumes) may cause lung oedema.

Immediate Medical Attention and Special Treatment Needed

Treat symptomatically for strong acids.

fire risk. Acids may react with metals to produce hydrogen, a highly flammable and explosive gas. Heating may cause expansion or decomposition leading to violent rupture of containers.

Combustion products include carbon monoxide (CO), carbon dioxide (CO₂), hydrogen chloride, phosgene, nitrogen oxides (NO_x), and other pyrolysis products typical of burning organic material

Hazchem Cod: 2X

Fire-fighting measures – call 111

Suitable Extinguishing Media

Extinguishing media suitable for surrounding fire

Specific Hazards Arising From The Chemical

Non-combustible. Not considered to be a significant

Condensed key safety information POWERQUAT BLUE

HSNO Approval number: HSR002591

Recommended use: For bleaching and deodorizing of textiles, wood pulp, hair, fur etc.; Bleach for textiles, paper, oils, waxes, starch; as spray for sterilisation of air and interiors of germ-free laboratories.

Hazard Statement (s)

May intensify fire; oxidiser.
May be corrosive to metals.
Harmful if swallowed.
Harmful if inhaled.
Harmful in contact with skin.
Causes severe skin burns and eye damage.
May cause respiratory irritation.
Causes damage to organs through prolonged or repeated exposure.
Very toxic to aquatic life.
Harmful to terrestrial invertebrates.

Precautionary Statement (s)

Keep out of reach of children

Precautionary statement – Prevention

Keep/Store away from clothing/combustible materials.
Take any precaution to avoid mixing with combustibles
Keep only in original container.
Do not breathe dust/fume/gas/mist/vapours/spray.
Wash contaminated skin thoroughly after handling.
Do not eat, drink or smoke when using this product.
Use only outdoors or in a well-ventilated area.
Avoid release to the environment.

Precautionary statement – Response

IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
IF SWALLOWED: rinse mouth. Do NOT induce vomiting.
IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310 Immediately call a POISON CENTER or doctor/physician.
Get medical advice/attention.
In case of fire: Use for extinction.
Collect spillage.

Precautionary statement – Storage

Store in a well-ventilated place. Keep container tightly closed.
Store locked up.
Store in corrosive resistant/ container with a resistant inner liner.

Precautionary statement – Disposal

In the case of a substance that is in compliance with a HSNO approval other than a Part 6A (Group Standards) approval, a label must provide a description of one or more appropriate and achievable methods for the disposal of a substance in accordance with the Hazardous Substances (Disposal) Regulations 2001

Personal Protective Equipment

PERSONAL PROTECTION RESPIRATOR: Type AB
Filter of sufficient capacity
EYE: Safety glasses with side shields, chemical goggles, Full face shield, contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lens or restrictions on use, should be created for each workplace or task. This should include a review of lens absorption and adsorption for the class of chemicals in use and an account of injury experience. Medical and first-aid personnel should be trained in their removal and suitable equipment should be readily available. In the event of chemical exposure, begin eye irrigation immediately and remove contact lens as soon as practicable. Lens should be removed at the first signs of eye redness or irritation - lens should be removed in a clean environment only after workers have washed hands thoroughly. [CDC NIOSH Current Intelligence Bulletin 59].
HANDS/FEET:
Barrier cream, PVC gloves, Rubber boots, Butyl rubber gloves or nitrile rubber gloves, elbow length PVC gloves. DO NOT allow clothing wet with materials to stay in contact with skin., Overalls, eye wash unit.

Accidental release measures

Clean-up Methods - Small Spillages

Clean up all spills immediately. Avoid contact with

skin and eyes.

Wear impervious gloves and safety glasses.
Small quantities may be discharged to sewer with a large excess of water.
Do not return unused product to original container
Wipe up.

Handling and storage

Precautions for Safe Handling

Avoid generating and breathing mist.
Handle and open container with care.
Use good occupational work practice.
Observe manufacturer's storing and handling recommendations.
Avoid all personal contact, including inhalation.
Wear protective clothing when risk of exposure occurs.
Use in a well-ventilated area.
Avoid contact with incompatible materials
DO NOT return unused product to containers.
When handling, DO NOT eat, drink or smoke.
Always wash hands with soap and water after handling.

Conditions for safe storage, including any incompatibilities

SUITABLE CONTAINER

Glass container is suitable for laboratory quantities.
Polyethylene or polypropylene container.
Packing as recommended by manufacturer.
Check all containers are clearly labelled and free from leaks.

STORAGE REQUIREMENTS

Keep cool. Store below 25 deg.C.
Store in original containers.
Keep containers securely sealed.
Store in a cool, dry and well-ventilated area protected from environmental extremes.
Store away from incompatible materials and foodstuff containers. Store in original containers. and Store under cover.
Store away from sunlight.
DO NOT use mild steel or galvanised containers.
Store in an upright position. Protect containers against physical damage.
Check regularly for spills and leaks.
Incompatible with acids, reducing agents, bases, oxidizing agents, combustible materials, organic materials, metals, metal salts and permanganates
Mild steel, brass, bronze and copper equipment should not be used.

First Aid measures – Call 111

First Aid Measures

24 Hour Emergency Contact: 0800 CHEMCALL (0800 243 622)
New Zealand Poisons Information Centre: 0800 POISON (0800 764 766)
New Zealand Emergency Services: 111

Inhalation

If fumes or combustion products are inhaled remove from area of exposure.
Lay patient down. Keep warm and rested.
Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures.

Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if necessary.

Ingestion

Rinse mouth out with plenty of water.
For advice, contact a Poisons Information Centre or a doctor.

If swallowed do NOT induce vomiting.
If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.
Observe the patient carefully.
Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious.

Skin

If skin or hair contact occurs:
Immediately flush body and clothes with large amounts of water, using safety shower if available.
Quickly remove all contaminated clothing, including footwear

Wash skin and hair with running water. Continue flushing with water until advised to stop by the Poisons Information Centre.

Transport to hospital, or doctor.

Eye contact

If this product comes in contact with the eyes:
Immediately hold eyelids apart and flush the eye continuously with running water.
Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.

Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes.

Transport to hospital or doctor without delay.

Advice to Doctor

Treat symptomatically.

Fire-fighting measures – CALL 111

Suitable Extinguishing Media

Flooding quantities of water only in the early stages of a fire.

Water spray or fog.

DO NOT use halogenated fire extinguishing agents.

NOTE: Chemical extinguishing agents may accelerate decomposition. [CCINFO]

Hazards from Combustion Products

Non-combustible liquid.

Will not burn but increases intensity of fire.

Contact with readily oxidizable organic material may cause ignition /fire.

Heating may cause expansion or decomposition leading to violent rupture of containers.

Hazchem Code: 2P
